After more than a decade as its chief executive officer, Stan Maly joined the Canadian regulatory body that regulates his former industry to serve as chair. Maly, who ran the previous CN Rail in the early 1990s, was named the chairman and chief executive of the Canada Transportation Agency on Thursday. Under his leadership, the agency will play a lead role in the integration of air, water, rail and marine transportation systems in Canada and the development of a national strategy to address future transportation challenges. “We are delighted to have Stan as our chair,” the agency’s executive director, Marilyn Brunette, said in a statement. “His experience and his vision will be an invaluable asset as we work to modernize transportation in Canada.” The agency’s predecessor, Transport Canada, had been without a permanent chair since the retirement of Lyle Grant in 2008. “The appointment of Stan Maly to the new chair role represents a significant step forward in Canada’s transportation reform,” said John Crosbie, a former federal transport minister who will be a consultant to the agency. “His extensive experience and knowledge of the transportation industry will be of great benefit in shaping the agency’s vision, strategy and priorities.” As chair, Maly will also be deputy minister for the department, which will be renamed Transportation and Infrastructure to better reflect the agency’s scope. He takes over from Patrick Daniel who stepped down in October. Maly was the CEO of the Canadian National Railway for 16 years before he retired in 2007. He served as president of the Canadian Transportation Agency from 2008 to 2011 and has also held senior positions with Canadian Pacific Railway, Canadian National Railway and Canadian National. Maly’s appointment comes as the agency is engaged in a major review of the country’s transportation network. The national transportation strategy review was launched in January by the agency. The panel — comprised of representatives from the public, private and not-for-profit sectors — will provide recommendations on how to modernize Canada’s road, rail, marine and air transportation systems in order to meet the needs 1d6a3396d6
